

Variable	Description
Plant Position	number from 1-20, counting up from left to right when you are looking at

Date	Description
May 18, 2012	

: the plants from the ant mound.

gs. I then put plants in ascending order and assigned the first 6 plants within each geno

type to block 1 and so on. I then ordered genotypes within block and assigned the first :

2 plants to 1 m distance from ant mound and so on. I then ordered gentotypes within blc

ock within distance and assigned the first plant within each distance to the aphid treatment
